İNGİLİZCE DERSİ
ÖĞRETİM PROGRAMI
(İlkokul ve Ortaokul 2, 3, 4, 5, 6, 7 ve 8. Sınıflar)
MAJOR PHILOSOPHY OF THE CURRICULUM

English language curriculum has been revised in accordance with the general objectives of Turkish National Education as defined in the Basic Law of the National Education No. 1739, along with the Main Principles of Turkish National Education. The present revision includes two major dimensions with three sub-dimensions for each, as follows:

1. Revision of the theoretical framework;
   a. Reviewing the curriculum with regards to values education
   b. Including the basic skills as themes
   c. Expanding certain subsections, such as testing and evaluation and suggestions

2. Revision of each grade by;
   a. Revision of the targeted language skills and their linguistic realizations
   b. Evaluation and the update of the contexts, tasks and activities
   c. Analysis and general update of the curriculum in terms of functions and forms covered

To provide a high-quality English language education for primary and lower secondary students in Turkey, a periodic revision of the courses is essential to maintain an up-to-date and effective curriculum. Furthermore, the recent changes in Turkish educational system, which entailed a transition from the 8+4 educational model to the new 4+4+4 system, have led to an immediate need for the redesign of current curricula. With respect to English language education, in particular, this system mandates that English instruction be implemented from the 2nd grade onward, rather than the 4th grade; therefore, a new curriculum accommodating the 2nd and 3rd grades was necessary, which led the preparation of the previous version of this curriculum. The present revision, not a drastic one, primarily aims at updating the curriculum with regards to the views obtained from the teachers, parents and academicians. This objective shaped the nature of the second revision. Basically, the curriculum was reviewed and revised in line with the pedagogic philosophy of both basic skills and values education, which has been a minor revision in that the English language education curriculum focuses on developing the language skills and proficiency without any concrete course content.

In designing the new English language curriculum, the principles and descriptors of the Common European Framework of Reference for Languages: Learning, Teaching, Assessment (CEFR) were closely followed. The CEFR particularly stresses the need for students to put their learning into real-life practice in order to support fluency, proficiency and language retention (CoE, 2001); accordingly, the new curricular model emphasizes language use in an authentic communicative environment. As no single language teaching methodology was seen as flexible enough to meet the needs of learners at various stages and to address a wide range of learning styles, an eclectic mix of instructional techniques has been adopted, drawing on an action oriented approach in order to allow learners to experience English as a means of communication, rather than focusing on the language as a topic of study. Therefore, use of English is emphasized in classroom interactions of all types, supporting learners in becoming language users, rather than students of the language, as they work toward communicative competence (CoE, 2001).

As the CEFR considers language learning to be a lifelong undertaking, developing a positive attitude toward English from the earliest stages is essential; therefore, the new curriculum strives to foster an enjoyable and motivating learning environment where young learners/users of English feel comfortable and supported throughout the learning process. Authentic materials, drama and role play, and hands-on activities are implemented to stress the communicative nature of English. At the 2nd and 3rd grade levels, speaking and listening are emphasized; while reading and writing are incorporated in higher grades as students become more advanced. Throughout each stage, developmentally appropriate learning tasks provide a continued focus on building the learner autonomy and problem-solving skills that are the basis for communicative competence.
GENERAL OBJECTIVES OF THE CURRICULUM

There is no question that the key to economic, political and social progress in today's society depends on the ability of Turkish citizens to communicate effectively on an international level, and competence in English is a key factor in this process. In order for meaningful learning to take place, in English as in any other subject area, the material must have relevance in students’ daily lives. Therefore, scholars such as Hymes (1972) and Widdowson (1978) have argued that language learning must be carried out in context; that is, it must be used in the course of everyday interactions, for true communicative purposes, rather than practiced as an abstract exercise.

Accordingly, in order to impress on students the role of English as a means of relaying needs and wants, voicing opinions and beliefs, building relationships, and so on, the new curricular model is focused on language learning as communication. The communicative approach entails use of the target language not only as an object of study, but as a means of interacting with others; the focus is not necessarily on grammatical structures and linguistic functions, but on authentic use of the language in an interactive context in order to generate real meaning (Larsen-Freeman & Anderson, 2011; Richards, 2006). In other words, learners/users engage in activities which require actual communication between peers or between students and their teacher, such as creating a game as a group and then playing it with classmates, rather than rehearsing prepared material (e.g., taking turns reading a printed dialog from a textbook or reciting memorized lists of verb forms). Classroom materials and teaching tools are drawn from authentic sources as much as possible in order to demonstrate English as it is used in real life. Furthermore, as motivation is essential to learner success, the curriculum aims to make learning English interesting, engaging and fun, taking into account the diverse needs of students at different developmental levels (Cameron, 2001).

It is therefore critical to define the scope of the present curriculum in terms of students’ characteristics, developmental periods and learning strategies. The curriculum covers a wide age period, between six and thirteen, and thus developmentally speaking, the curriculum has to serve young learners and adolescents (Pinter, 2006; Rixon, 1999). Because these two groups of learners are markedly different from each other in terms of cognitive and social characteristics, the curriculum takes these differences into account at all strata of the syllabi, such as contexts and tasks, cognitive load, assessment and evaluation as well as type of language skills covered. Young learners are predominantly provided with a ‘play world’, in which they are expected to sing, dance, play games, do arts and craft activities (McKay, 2006), all of which embedded with English language. Speaking and listening are the major skills depicted in the first three grades of the curriculum. Following years include all of the skills in line with the theoretical approach of the CEFR. Nevertheless, that does not mean teachers cannot offer any doable reading or writing tasks, which would be quite reasonable, and perhaps inevitable, in a communicative classroom atmosphere.

Another aspect of the curriculum relates to how students approach language learning in- and outside-the-classroom as well as how teachers are to shape those experiences with in-class tasks and various assignments. This aspect addresses the learning strategies (O’Malley & Chamot, 1990; Oxford, 1990, 1996). Learning strategies are handled in different dimensions within the curriculum. The first dimension is that teachers as well as book authors were provided with tasks and contexts that are relevant, interesting and achievable for the given group of students. The second dimension relates to the assignments that are offered in each unit of the syllabi to provide a sample of what is expected from teachers and book authors. The curriculum basically expects to vary learning strategies for both classroom instruction and assignments, which can be achieved by methodologically well-tuned instruction of the teacher and carefully selected assignments (Cohen, 2011). The third dimension is the frame of testing and evaluation perspective prescribed within the curriculum section. As was stated in the testing section, one of the most important aspects of the curriculum is to create positive and beneficial washback effect. This objective was set to lead students to exploit rich and wide range of learning strategies. In other words, the curriculum strictly refrains from overuse of some specific language learning strategies over others due to the examinations.
KEY COMPETENCES IN THE CURRICULUM

Key competences, as generic and common objectives of all educational programs across the EU, address the basic skills that each and every citizen is to acquire during formal education. Commenced by the European Commission in the EU countries, the key competences refer to the key knowledge, skills and attitudes that are expected to equip students with the personal realization of personal and professional development and growth, with the sole goal of societal inclusion and contribution. The key competences framed by the European Commission are:

- **Traditional Skills:**
  - Communication in mother tongue
  - Communication in foreign languages
- **Digital Skills:**
  - Literacy
  - Basic skills in math and science
- **Horizontal Skills:**
  - Learning to learn
  - Social and civic responsibility
  - Initiative and entrepreneurship
  - Cultural awareness and creativity

These key competences and specific sub-competences have been included within the educational programs of the EU countries. The educational policy in promoting the key competences is to 1) preparing effective learning materials and contexts for the learners, 2) decreasing early school-leaving, 3) increasing the participation to early childhood education and 4) improving the support mechanisms of the teachers and other shareholders. To this end, the Ministry of National Education has embarked on an extensive review and revision project for all curricula, including English curriculum, to include those key competences and to support the acquisition of them among learners.

English language education programs, like any other contemporary language programs, are not based on any course content on the grounds that language programs aim at teaching language skills and developing communicative competences (Canale & Swain, 1983). In other words, a foreign language program based on CEFR is framed in terms of language skills which stand for objectives for each unit, linguistic realizations of those language skills by referring to grade and language proficiency and pedagogic dimensions, such as suggested contexts and tasks as well as sample assignments shaped by specific language strategy (O’Malley & Chamot, 1990; Oxford, 1990, 1996). Therefore, any attempt to include key competences (as well as values education) in a foreign language education program is a challenging one. However, as the theoretical dimension of an educational continuum, an educational program can possibly offer what methodological choices course book authors and teachers should make to materialize the present curriculum and thus the key competences and values in the classroom. To this end, teachers and course book authors are provided with specific suggestions in the curriculum. In addition, the syllabus for each grade was reviewed to include the key competences and values as themes or topics, specifically to help teachers and course book authors to make effective contextual choices and other supplementary and additional materials.
VALUES EDUCATION IN THE CURRICULUM

No contemporary scholar of the educational sciences would discuss or describe education at any level without certain universal and local values that are critical for the individuals and societies. As prescribed in Basic Law of the National Education No. 1739 as well as in the modern literature concerned (UNESCO, 1995), values refer to the personal and societal beliefs and attitudes that are framed by specific universal and national dispositions. The new curriculum is different from the previous one in a sense that it focuses on values education. The key values that should be transferred to the learners in line with the learning outcomes are: friendship, justice, honesty, self-control, patience, respect, love, responsibility, patriotism and altruism. However, these values should not be considered as a separate entity. They should be embedded into the themes and topics of the syllabi.

Stakeholders such as teachers and material designers should take learners’ ages, psychological and sociological levels into consideration in selecting characters, texts, visuals to be used during the instruction process. For instance, if a movie poster is used, the age appropriateness of the movie should be taken into consideration in addition to our ethics and values. Besides, the selection of the characters should comply with ethics and values of our education system so that learners can have proper role-models. It is highly recommended to have this aim included in the materials to be designed.

TESTING AND EVALUATION APPROACH OF THE CURRICULUM

Testing as the superordinate construct, or assessment and evaluation in particular is one of the most important aspects of the curriculum owing to the fact that a testing procedure inconsistent with the nature of the curriculum would jeopardize all of the linguistic and pedagogic infrastructure and objectives. This inconsistency might shape the way teachers teach as well as the way students tend to learn, which are not depicted in the curriculum. Ultimately, such divergence might even lead to the instructional phenomenon, which is known as negative and harmful washback (Özmen, 2012). Therefore, it is critically important to accentuate that learning, teaching and testing are part of a whole, interacting constantly with each other in shaping not only teachers’ instructional choices but also students’ learning strategies, and even parents’ attitudes toward what is critical and valuable in educative provisions.

From this point of view, the theory of the testing procedures in the present curriculum is not different from that of learning and teaching: The theoretical frame of testing, assessment and evaluation processes is primarily based on the CEFR, in which various types of assessment and evaluation techniques are emphasized. Those are heavily centered on alternative and process oriented testing procedures. In addition self-assessment is also emphasized, as students are encouraged and expected to monitor their own progress and achievement in the development of communicative competences (Bachman, 1990; CoE, 2001). To this end, each unit includes a list of achievements to be met by the students; this will be converted to self-assessment checklists which ask students to assess their own learning from an action-based perspective. In other words, children are prompted to answer questions such as “What did you learn?”, “How much do you think you learned?” and “What do you think you can do in real life, based on what you learned in class?”

In addition to alternative process oriented testing techniques and self-assessment, formal evaluation will be carried out through the application of written and oral exams, quizzes, homework assignments and projects in order to provide an objective record of students’ success. This aspect of the testing procedures is based on Bachman’s (1990) theoretical proposals for testing ‘communicative competences’. Although the early stages of the curriculum, specifically the 2nd and the 3rd grades, young learners of English are not tested by any summative testing procedures (McKay, 2006). Instead, formative testing mechanisms work in cooperation with regular in- and outside-the-class tasks to create positive attitudes, beliefs and motives toward learning English. However, with the 4th grade and onwards, a set of formative and summative testing procedures are offered to test the communicative competences and thus the language proficiency of the students.
The explicit philosophy of the curriculum toward testing is that all kinds of testing procedures, including summative and formative assessment techniques or product and process oriented tests are to;

- cover four language skills and implicit assessment of language components;
- vary in terms of learning styles and cognitive characteristics of the students;
- be in consistent with the learning and teaching methodology depicted in the curriculum;
- be in line with the students’ developmental characteristics;
- create positive and beneficial washback effect;
- include self-assessment, reflection and feedback and
- help students identify their strengths and weaknesses and target areas that need work.

These propositions address the nature of the concrete testing techniques that should be exploited by the teachers for diagnostic, reflective and assessment purposes. Specifically for lower secondary education (from 5th grade to 8th grade), a rich variety of testing techniques is necessary to assess and evaluate students’ language proficiency, to help students observe their pace and to support instructional process by shaping how students study English outside the classroom. To reach those goals, particular formative and summative assessment methods might be accentuated: Formative assessments for English classrooms are generally low stakes examinations, which have little or no point value. Instead they are offered to facilitate learning process. For instance, students may be asked to 1) design a poster about the course to exhibit their learning and 2) summarize the main points of the course at the end of the lesson.

However, summative assessments procedures basically aim at evaluate students’ learning at the end of a specified instructional period by comparing the results against previously established standards or benchmark. Generally labeled as high stake examinations (having high point value), summative assessment techniques are to be in line with the nature of learning and teaching that are adopted by the curriculum and the teacher. Some of the summative techniques are: 1) a project, such as a visual dictionary prepared throughout the semester and 2) a regular pencil-paper examination. Inevitably, those specific testing techniques address the fact that the educational program offers both process and product oriented testing techniques (Brown & Abeywickrama, 2010). Such diversity in testing design is expected to strengthen the learning experiences of the students.

### SUGGESTED TESTING TECHNIQUES FOR THE ASSESSMENT OF LANGUAGE SKILLS

<table>
<thead>
<tr>
<th>Language Skills</th>
<th>Testing Techniques*</th>
<th>Suggestions for Test Preparation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speaking</td>
<td>Collaborative or singular drama performances (Simulations, Role-plays, Side-coaching), Debates, Group or pair discussions, Describing a picture/video/story, etc., Discussing a picture/video/story, etc., Giving short responses in specific situations, Information gap, Opinion gap, Reporting an event/anecdote, etc., Short presentations, Talking about a visual/table/chart, etc.</td>
<td>• Make sure you have prepared a reliable assessment rubric to assess students.  • Anxiety and inhibition may cause problems: Provide a relaxing atmosphere in testing.  • Encourage self- and peer-assessment if applies (for higher proficiency grades).</td>
</tr>
<tr>
<td>Listening</td>
<td>Different variations of matching (…the sentences with paragraphs … pictures with the sentences, etc.), Discriminating between phonemes, Identifying interlocutors’ intentions and implicatures, Listen and perform/complete an action (E.g.: Listen and draw/paint, listen and match, listen and put the correct order, listen and spot the mistake, etc.), Listen and tick (the words, the themes, the situations or events, the people, etc.), Omitting the irrelevant information, Putting into order/reordering, Recognizing phonemic variations, Selective listening for morphological structure and affixation, True/False/No information, Understanding overall meaning and supporting details, Recognizing specific information, Questions and answers.</td>
<td>• Include both bottom-up and top-down listening techniques.  • Bottom-up techniques typically focus on sounds, words, intonation, important grammatical structures, and other components of spoken language.  • Top-down techniques are concerned with the activation of schemata, with deriving meaning, with global understanding, and with the interpretation of a text.</td>
</tr>
<tr>
<td>Language Skills</td>
<td>Testing Techniques*</td>
<td>Suggestions for Test Preparation</td>
</tr>
<tr>
<td>-----------------</td>
<td>---------------------</td>
<td>---------------------------------</td>
</tr>
<tr>
<td>Reading</td>
<td>Different variations of matching (… the sentences with paragraphs, … pictures with the sentences, etc.), Finding specific information, Finding a title to a text, Identifying the gist and supporting details, Intensive reading, Read and perform / complete and action (E.g.: Read and guess the meaning of lexemes, Read and draw/paint, Read and solve the riddle), Solving a puzzle, Spotting text mechanics (reference, substitution, various types ellipses), True/False/No information, Transferring the text to a table/chart (Information transfer), Understanding the author’s intention, Questions and answers.</td>
<td>• Include both bottom-up and top-down reading techniques. • Bottom-up techniques focus on morphological dynamics, words, collocations, key grammatical structures, and other components of written language. • Top-down techniques are concerned with the activation of schemata, with deriving meaning, with global understanding, and with the interpretation of a text.</td>
</tr>
<tr>
<td>Writing</td>
<td>Describing a picture/video, etc., Filling in a form (hotel check in form, job application form, etc.), Note taking/making, Preparing an outline, Preparing a list (shopping list, a to-do list, etc.), Reporting a table or a chart, Rephrasing, Rewriting, Writing short notes, entries and responses, Writing a paragraph/e-mail/journal entry/etc., Writing a topic sentence/thesis statement</td>
<td>• Make sure you have prepared a reliable assessment rubric to assess students. • Provide a Genre (what to write), Audience (whom to write) and Purpose (why to write) for each writing assessment task. • Encourage self- and peer-assessment if applies (for higher proficiency grades).</td>
</tr>
<tr>
<td>Samples for Integrated Skills</td>
<td>Summarizing a text (listening/reading and writing), Taking notes (listening and writing), Reporting an event (listening/reading and speaking), Paraphrasing (listening/reading and writing), Preparing a mind-map (reading/listening and writing), Cloze/C-test (reading and writing), Dictation (listening and writing), Reading a text and present it (reading and speaking), Writing a text and present it (writing and speaking), Outlining a reading text (reading and writing)</td>
<td>• Offer authentic or real-like tasks to promote communicative testing. • Avoid offering tasks beyond students’ current intellectual and cognitive maturity. • Provide samples to trigger task completion via linguistic performance.</td>
</tr>
<tr>
<td>Alternative Assessment</td>
<td>Portfolio Assessment, Project Assessment, Performance Assessment, Creative Drama Tasks, Class Newspaper/Social Media Projects, Journal Performance, etc.</td>
<td>• Determine initially the content, criteria for task inclusion, describe criteria for grading and the analytic rubric carefully, and present those aspects to the students before the application. Make sure students understand and accept the rules of application. • Encourage the inclusion of all language skills in portfolio content with equal weight and value. • Note that portfolio assessment procedure would be incomplete and thus useless without feedback and reflection.</td>
</tr>
</tbody>
</table>

* Please note that the testing techniques offered in the table are merely suggestions; different testing techniques that comply with the communicative testing philosophy may be exploited by the teachers, course book authors and material developers.

**STRUCTURE OF THE CURRICULUM**

In framing the new curricular model for English, no single teaching methodology has been designated. Instead, an action-oriented approach grounded in current educational research and international teaching standards has been adopted, taking into account the three descriptors of the CEFR comprising learner autonomy, self-assessment, and appreciation for cultural diversity (CoE, 2001). In doing so, it is expected that learners will become confident and proficient users of English, developing appreciation for their own unique culture while learning to understand and value a broad spectrum of international languages and cultures in accordance with CEFR's.
Instructional design: The curricular model is divided into 3 learning stages with respect to the language uses, functions and learning materials that are introduced. At the earliest levels, comprising grades 2 through 4, the main emphasis is on listening and speaking. Reading, writing, and grammatical structures are not a focus at this stage, in line with research indicating that younger children learn languages best through songs, games, and hands-on activities (Cameron, 2001). Thus, reading and writing tasks at the lower grade levels are limited.

At the earliest stages, learners are introduced to English through cognates; these are believed to provide a bridge between languages, helping learners to transition from the known to the unknown using terms that are easily recognizable (Rodriguez, 2001). This concept is supported by Krashen’s (1988) argument that language input must be interesting, relevant and comprehensible to stimulate comprehension. In the 5th and 6th grades, as students continue to develop their language skills, exposure to short texts is introduced. At the same time, these learners may participate in controlled writing activities such as filling out a club membership registration card with their name, date of birth, address, and other concrete, factual information. In the 7th and 8th grades, older students who have formed the necessary foundation for an understanding of literacy issues will then be exposed to reading and writing as an integral aspect of language learning, such as reading simple texts or writing short, simple stories about their friends (Bayyurt & Alptekin, 2000). This approach follows Cummins’ (1984) model, which advocates a progression from cognitively undemanding, context-embedded activities to cognitively demanding, context-embedded tasks, moving from familiar to unfamiliar concepts in building language and literacy skills.

Accordingly, the learning materials and language functions to be taught have been selected to reflect the types of activities appropriate to each learning phase. At stages 1 and 2, comprising the 2nd - 4th and the 5th - 6th grades, similar materials types and language functions are given; these are expected to be adapted to suit the activities specified for each level. At stage 3, additional materials and functions are used along with those applied at stages 1 and 2. This design will permit classroom teachers to choose from the learning applications they feel are best suited to the specific needs of their students.

As noted by Larsen-Freeman and Anderson (2011), attention to the formal aspects of language is an essential element in the construction of meaning; therefore, it is necessary to consider these in the context of communicative language learning. However, in accordance with Cameron’s (2001) contention that children’s grammatical knowledge of a language emerges naturally through “the space between words and discourse” (p. 18), the structural features of English are handled implicitly as learners/users develop communicative skills, rather than addressed as a separate issue.

Instructional materials: For each grade level, a series of 10 sample units is provided, structured around interrelated themes. The use of thematic units is supported by Hale and Cunningham (2011), who point out that this approach allows educators to present new information in a manner that is both relevant and interesting to learners, encouraging them to build on existing knowledge while at the same time revisiting earlier material in as a means of supporting retention. In order to create a link between language learning and daily life, the themes for each unit have been chosen to reflect ideas and issues that are familiar to young students; therefore, themes such as family, friends, animals, holidays, leisure activities and so on are highlighted. In consideration of the CEFR’s emphasis on developing intercultural competence and appreciation for cultural diversity (CoE, 2001), cultural issues are also addressed. Elements of both the target culture and international cultures are presented in a positive and non-threatening manner (Elyıldırım & Ashton-Hayes, 2006) in keeping with the themes of each unit, at the same time stressing the value of home culture in order to avoid the formation of negative attitudes.

Materials developers are encouraged to follow this model in the design of integrated resources that can be tailored to meet the needs of students in a diverse range of contexts with respect to school type, sociocultural outlook and economic status, thus allowing classroom teachers greater discretion in the selection of appropriate activities and learning materials (Trujillo, Torrecillas, & Salvadores, 2004). On the other hand, although previous English language curricula have been designed according to the principles of communicative language teaching, conventional textbooks have often allowed for too much flexibility in classroom application. As a result,
there has been a tendency among some teachers to repurpose the tasks that are presented, frequently de-emphasizing their communicative aspect. For instance, instead of teaching an interactive question-and-answer song, a teacher might adapt it as a listen-and-fill-the-blanks activity. To address this issue, teacher resource packs, which may consist of lesson plans, printed handouts, flashcards, audio-visual materials and so on, will be considered besides textbooks, particularly at the 2nd, 3rd and 4th grade levels. These packages may be adapted according to a particular teaching context, thus supporting classroom instructors in meeting the needs of their students while at the same time maintaining compliance with the objectives of the newly established curricular model.

A suggested model: It is often the case that, in spite of careful planning, a curricular model differs in many respects from the one that is put into practice; numerous external factors may affect its application, including school administrators, facilities, classroom resources and materials, teachers, class size, parents, and the students themselves. Therefore, the ultimate success of this curriculum requires the external support, careful planning and committed partnership of all involved. It is also important to note that such models are broad frames that addresses millions of students and thousands of teachers in Turkey's case. Therefore, a fine-tuned English education is not only based on a generic model of English curriculum, but rather to a careful planning, getting familiar with the characteristics of the school district and the demography so that the administrators and teachers could be able to identify the needs, expectations and possible readiness level of the students.

* Any skill marked as very limited refers to short and simple oral/written texts and materials. For instance, in the 2nd through the 4th grades, the focus is primarily on developing listening and speaking skills, as supported by Cameron’s (2001) assertion that “for young learners, spoken language is the medium through which the new language is encountered, understood, practiced and learnt” (p. 18). Therefore, activities involving reading and writing are limited to the word level (e.g., learners see a picture of a cat and write the word “cat” underneath). On the other hand, skills marked as limited are used for no more than 25 words at a time for the grade level indicated; accordingly, at the 5th and 6th grade levels, as students continue to develop their language skills, exposure to reading is upgraded to the sentence level. In the 7th and 8th grades, older students who have formed the necessary foundation for an understanding of literacy issues will then be exposed to reading and writing as an integral aspect of language learning.

∞ Theme-based instruction is characterized by the following: a highly contextualized language learning environment; language usage and lexis centered around the topic; and skills and activities integrated by the theme selected, with the topic of instruction (e.g., scientists, geography, responsibilities at home, etc.) serving as a connecting thread and targeting meaningful, situation-based learning.
All of the foreign language skills [Reading (R), Listening (L), Speaking (S¹), and Writing (W)] were addressed throughout the new curriculum for English language, yet little emphasis is given to reading and writing in the second and third grades. The learning outcomes specified within the curriculum were coded with regard to the course name, grade, unit title/theme number, language skill and the number of the learning outcomes. Language skills were also coded to pinpoint the place of a given objective throughout the syllabus. These codes were then assigned to each learning outcome, as follows:

<table>
<thead>
<tr>
<th>Course and Grade</th>
<th>Theme</th>
<th>Language Skill and Learning Outcome</th>
</tr>
</thead>
<tbody>
<tr>
<td>E6.1 SP1.</td>
<td></td>
<td>Students will be able to use a series of phrases and simple expressions to express repeated actions.</td>
</tr>
</tbody>
</table>

The functions and the useful language, language skills and learning outcomes as well as suggested materials/tasks-contexts/assignments were presented in three different consecutive columns in the syllabi. Below are provided the definitions for each of those titles:

1. Functions and Useful Language: The functions refer to the communicative role(s) of a given form in a context of situation. The present curriculum is structured in terms of communicative functions and specific useful language units with which functions are associated to offer a linguistic repertoire throughout a continuum of a language proficiency depicted in and for each grade. Thereby, teachers and material designers should be informed that the functions and associated useful language are hierarchical in nature; that is to say, the functions and useful language units are built on one another and constructed in a cyclical way. **It is highly recommended that teachers and material developers use structures and lexis given in this column.**

2. Language Skills and Learning Outcomes: The second column comprises language skills that are presented as specific subskills and/or strategies. Those subskills and strategies are associated with the functions and useful language in terms of theme, context and task requirements. Hence, it is important to accentuate that each objective specified in learning outcomes can be fulfilled merely by addressing the language functions and their linguistic realizations.

3. Suggested Contexts, Tasks and Assignments: This column presents suggested contexts, tasks and assignments to help students achieve a success in practicing the input and language skills in the preceding columns. It is highly recommended that teachers and material developers exploit those suggestions to provide students with a wide range of learning repertoire addressing different learning styles and strategies.

¹ Speaking skill was identified as Spoken Interaction (SI) and Spoken Production (SP) in the 6th, 7th and 8th Grade Syllabi.
IMPORTANT ISSUES FOR THE APPLICATION OF THE CURRICULUM

Our language learning environment is characterized by the following communicative features:

• Communication is carried out in English as much as possible.
• Communication is focused on the creation of real meaning.
• Students listen and speak just as they would in a target language community.
• Students use their developing English skills in every aspect of learning.
• Students are continuously exposed to English through audio and visual materials.
• Enjoyment of language learning is fostered through activities such as arts and crafts, TPR, and drama.
• Students are taught to value their mother tongue and feel validated in using it as needed while they move forward on their journey in English.
• L1 (first language) usage is not prohibited or discouraged, but it should be employed only as necessary (i.e., for giving complex instructions or explaining difficult concepts).
• Students are supported and guided by smiling teachers who “understand” what they are saying.
• Teachers are present in the classroom mainly for communicating in English (and, if necessary, in Turkish).
• The focus of learning is on deepening communication, rather than on completing curricular items within a given period of time.
• Errors are not addressed during communication, so as not to disrupt the flow; problem areas are noted by the teacher and addressed at a later time through practice and reinforcement.
• Students frequently encounter materials that have previously been covered in order to reinforce what they already know.
• Students develop high motivation for learning by completing challenging, yet achievable activities.
• Students produce materials to share with the rest of the school and the outside world.
• Parents are encouraged to be part of the process and are kept up-to-date on their child’s learning through parent-child meetings.
• Students develop communicative skills in English by “doing things with the language” rather than by “learning about the language”.
• Course book authors and material developers are expected to address values and key competences depicted in the curriculum by making effective context choices.
• Course book authors and material developers are expected to include values and key competences depicted in the curriculum implicitly in course materials.
• Coursebook authors and material developers are expected to employ the characters and the places that the learners are most likely to confront in their daily lives.
• Textbooks must be formed according to the page/signature numbers and size standards presented in table in Appendix 4.
2nd AND 3rd GRADE ENGLISH SYLLABI - SUGGESTIONS FOR PRACTICE

• Go from the familiar to the unfamiliar. Use cognates as a starting point (e.g., doctor, zebra, gorilla). Use media, cultural artifacts and people as much as possible to contextualize the lessons and to keep students’ interest alive.

• Remind children that learning English language is easy and enjoyable.

• Do not correct students’ errors on the spot. Note down the language issues that cause confusion, and then practice them as much as possible.

• In 2nd Grade syllabus, vocabulary and structures are kept at least level. There are two basic reasons. The first one is increasing motivation and interest of students to English Language by endearing with the activities done with them. The second one is giving more importance to interaction instead of content thus the activities in the lessons will be enjoyable and instructional. Interact with students through question-answer and repetition techniques.

• The syllabus should be viewed and practiced as a spiral entity. Remind students’ earlier learning and use previous activities, songs and vocabulary to support retention.

• Suggest students frequently that they sing the songs they learn at school. Recommend the parents to encourage and appreciate their children.

• Use “headlines” when you speak, especially at lower grade levels. A headline is using the most expressive word in a chunk (especially with a rising or falling intonation) to get the message across. Examples:
  
  Are you thirsty? “Water?” / Are you having fun “Fun?”

  Take out your crayons. “Your crayons!” / It’s easy, isn’t it? “Easy, huh?"

• Students should not have notebooks at the 2nd and 3rd grade levels, as the focus is on listening and speaking only. Do not give them the lyrics of the songs you are singing as reading material. They should pick the words up from the song and from you.

• Reading aloud is an interesting activity for this age group. Use drama and gestures as you read. Change your voice as appropriate, especially to voice a different character.

• Units are not discrete. You can always move between and among the units. Integrate bits and pieces as much as you like so as to make the communication run smoothly.

• Note the importance of differences between home and target culture, and be pedagogically correct. For instance, do not create negative models for students, as is the case with the teaching of elements such as food items in many materials. Refrain from giving examples such as children looking at fruits and vegetables and saying “yuck!”.

5. SINIF İNGİLİZCE ÖĞRETİM PROGRAMI

Temel Düzey Kullanıcı
Giriş veya Keşif Düzeyi (A1) Ortak Yeti Açıklamaları

Öğrenciler sıradan ve gündelik deyişlerle somut gereksinimleri karşılamayı hedefleyen son derece yalin ifadeleri anlayabilir ve kullanabilir. Kendini veya bir başkasını tanıtabilir ve karşısındaki kişiye basit sorular (örnegin oturduğu yer, ilişkileri, sahip olduğu şeyler vb.) sorabilir ve aynı türden sorulara yanıt verebilir. Eğer karşısındaki kişi yavaş ve kendisine yardımcı olacak biçimde konuşuyorsa öğrenci basit biçimde iletişim kurabilir.

6. SINIF İNGİLİZCE ÖĞRETİM PROGRAMI

Temel Düzey Kullanıcı

Giriş veya Keşif Düzeyi (A1) Ortak Yeti açıklamaları

Öğrenciler sıradan ve gündelik deyişlerle somut gereksinimleri karşılamayı hedefleyen son derece yalın ifadeleri anlayabilir ve kullanabilir. Kendini veya bir başkasını tanıtabilir ve karşısındaki kişiye basit sorular (örnegin oturduğu yer, ilişkileri, sahip olduğu şeyler vb.) sorabilir ve aynı türden sorulara yanıt verebilir. Eğer karşındaki kişi yavaş ve kendisine yardımcı olacak biçimde konuşuyorsa öğrenci basit biçimde iletişim kurabilir.

## In The Kitchen

### Functions & Useful Language

#### Describing simple processes

It's easy to make an omelette. Let me tell you how to make an omelette. First, put some oil into a pan and heat it. Second, mix two eggs in a bowl. Then add some salt. After that, add some cheese and milk. Finally, pour the mixture into the hot pan.

#### Expressing preferences

Do you prefer cooking pizza or pasta?—I love cooking and eating pizza.—I usually prefer cooking pasta.

#### Making simple inquiries

Do I use two or three eggs?—What can I use to cook soup?

### Languages Skills and Learning Outcomes

#### Listening

**E8.3.L1.** Students will be able to get the gist of short, clear, simple descriptions of a process.

#### Spoken Interaction

**E8.3.SI1.** Students will be able to ask and answer questions and exchange ideas and information on a topic related to how something is processed.

#### Spoken Production

**E8.3.SP1.** Students will be able to give a simple description about a process.

#### Reading

**E8.3.R1.** Students will be able to understand the overall meaning of short texts about a process.

**E8.3.R2.** Students will be able to guess the meaning of unknown words from the text.

#### Writing

**E8.3.W1.** Students will be able to write a series of simple phrases and sentences by using linkers to describe a process.

* ADOÇEP = Avrupa Dilleri Öğretimi Ortak Çerçeve Programı

∞ Tema bazlı öğretimin temel özellikleri şunlardır: Yüksek düzeyde bağlamlandırılmış öğrenme ortamı, bir konu çerçevesinde ele alınan sözcük ve dil bilgisi yapılan, anlamlı duruma dayalı öğrenmeyi sağlayan ders konusuna (Örnek: Bilim insanları, coğrafya, evdeki sorumluluklar vb.) göre seçilmiştir tema ile bütünleşen beceriler ve etkinliklerdir.
İNGİLİZCE ÖĞRETİM PROGRAMI'NIN UYGULANMASINA DÂİR ÖNEMLİ HUSUSLAR

Sınıftaki öğrenme ortamımız aşağıdaki iletişimsel özelliklere dayandırmaktadır:

- İletişim mümkün olduğunca İngilizce yürütülür.
- İletişim gerçek anlam oluşturmaya odaklıdır.
- Öğrenciler gerçek yaşamda o dili konuşan ülkelerdeki insanlar gibi dinleme ve konuşma eylemlerinde bulunurlar.
- Öğrenciler gelişen İngilizce becerilerini öğrenmenin her alanında kullanırlar.
- Öğrenciler görsel ve işitsel araçlar yardımyla hedef dilde kullanılan yapı ve sözcüklerle sürekli olarak karşılaşırlar.
- Öğrenciler dili, el işleri, tüm bedensel tepki ve drama etkinlikleriyle eğlenceli bir şekilde kullanırlar.
- Öğrenciler İngilizce öğrenirken kendi ana dillerine de saygı duyar ve ana dillerini, gelişimlerinin önemli bir parçası olarak görürler.
- Ana dilin kullanımı yasaklanmaz ve engellenmez. Ana dili gerektiğinde kullanılır (Örneğin karmaşık yönergeler verirken, zor yapıları açıklarken).
- Öğrenciler kendilerini jest, mimik gibi olumlu pekiştireçlerle "anlayan" öğretmenler tarafından desteklenir ve yönlendirilirler.
- Öğretmenlerin sınıfta bulunma nedeni İngilizce (ve gerekirse Türkçe) iletişim kurmalarıdır.
- Öğrenmenin amacı belirli bir zaman aralığında Öğretim Programı'ndaki konuları işleyip bitirebilmek yerine kurulan iletişimi derinleştirmeye çalışmaktadır.
- Öğrenciler iletişim kurarken hata yapmaları hâlinde uyarılmaz ve düzeltilmez. Öğretmenler iletişimin devamlılığına odaklanarak öğrencilerin hatalarını daha sonra düzeltilirler.
- Öğrenciler daha önceki derslerde karşılaştıkları islev ve bilgileri tekrar tekrar kullanırlar ve böylece bilgi ve becerilerini taze turlarlar.
- Öğrenciler kendilerini zorlayan ama yapılabilir etkinliklerin üstesinden gelenleri artarlar.
- Öğrenciler okul içinde ve dışında paylaşılacak ürünler ortaya koyarlar.
- Veliler sürecin bir parçası olmalı için cesaretlendirirler ve veli toplantıları aracılığıyla çocukların öğrenme sürecinden haberdar olurlar.
- Öğrenciler “bir dil hakkında bir şeyler öğrenmek” yerine “o dille bir şeyler yaparak” İngilizce iletişim becerilerini geliştirirler.
- Kitap yazarlarının ve materyal geliştirme uzmanlarının Öğretim Programı’nda bahsedilen değerlere ve temel yeterliklere bağlam tercihlerinde yer vermeleri gerekmektedir.
- Kitap yazarlarının ve materyal geliştirme uzmanlarının Öğretim Programı’nda bahsedilen değerleri ve temel yeterlikleri ders materyallerinde örtük bir biçimde sunmaları gerekmektedir.
- Kitap yazarlarının ve materyal geliştirme uzmanlarının öğrencilerin günlük yaşamlarında karşılaşıkları muhtemel karakter ve yerleri daha çok örnek vermeleri gerekmektedir.
- Ders kitapları Ek 2’deki tabloda verilen forma sayısı ve ebat standartlara uygun olarak hazırlanmalıdır.
APPENDIX 3

2 VE 3. SINIF İNGİLİZCE ÖĞRETİM PROGRAMI - UYGULAMA ÖNERİLERİ

• Bilinenden bilim Meyene doğru gidiniz. Özellikle Türkçe ve İngilizcede ortak olan sözcüklerden yararlanarak derse başlayıniz (Örneğin doctor, zebra, lemon vb.). Çocukların sevdiği ve bildiği medya ve kültür ögelerine de öncelik veriniz.

• Çocuklarına İngilizcenin kolay ve çok zevkli olduğunu hatırlatınız.

• Çocuklarını yaptıkları hataları anında düzeltmeyiniz. Ancak bu hataları net ederek ve kendiniz doğruysunu sık sık kullanarak sınıfı hatırlatınız.

• Öğretim Programı sarmal olarak düşünülmeli ve öyle uygulanmalıdır. Öğrencilerin önceki öğrenmelerini hatırlatınız ve öğrenmelerin kalıcılığını desteklemek için daha önce etkinliklik şarklı ve kelimeleri kullanınız.

• Öğrencilerin sık sık evlerinde ailelerine öğrendikleri şarkıları söylemesini ve onların takdir etmelerini hatırlatınız.

• İngilizce konuşurken “headlines” kullanmaya özen gösteriniz (Bir fikri veya mesajı iletmek için yalnızca birkaç içerik sözcüğünü kullanmak ki çoğunlukla nesnelerin vurgu ve tonlama ile zenginleştirilmesi yoluya olur.). Örneğin

Are you thirsty? “Water?” / Are you having fun “Fun?”

Take out your crayons. “Your crayons!” / It’s easy, isn’t it? “Easy, huh?”

• 2 ve 3. Sınıf Öğretim Programlarında 4 temel beceriden okuma ve yazma öğretimi geliştirilmesi gereken hedefler arasında değildir. Öğrenciler İngilizce defterleri olmamalıdır. Öğrenciler şarkı sözlerini dinleyerek ve tekrar ederek öğrenmelidir. Şarkı sözlerini veya sözçülerini öğretmek için okuma ve yazma yolu seçilmemelidir.

• Öğretmenin sesli okuması bu düzey öğrenciler için ilgi çekicidir. Onlarla şarkı sözlerini dahi dramatizasyon ve jest-mimik kullanarak, tonlayarak, taklit ederek ve vurgulamaları dikkat ederek okuyunuz.

• Üniteler/temalar arasında geçiş akıcı olmalıdır. Her ne kadar sırayla gidilecek olsa da bir sonraki ünite/tema önceki ünite/temada öğrenilenlerle ilişkilandırılmalı ve böylece birbirlerine entegre edilmelidir.

• Kültürsel farkındalıklara dikkat ediniz. Bunu yaparken eğitimsel ve kültür olarak çocuklara yanlış davranış ve alışkanlıklar oluşturabilecek etkinlik ve hareketlerden uzak durunuz.
